The CHPS searchable high performance building products database opened in 2009 with support from the U.S. Environmental Protection Agency and California's Department of Resources Recycling and Recovery (CalRecycle). Our goal is to make products available that help schools meet CHPS and other green building criteria, and deliver environmental and health benefits to their occupants. The database expands on the success of the CHPS low-emitting materials list to include other attributes, such as recycled content and Forest Stewardship Council (FSC) Certified wood products.
