ADDITIONAL COMMENTS

INSTRUCTIONS FOR USE:

- A. The primary use of this questionnaire is to provide a detailed checklist that will facilitate precise development of specifications with drawings, to ensure that all parties are talking about the same type and quality of building.
- B. Division 01 is a General Project Description which outlines code requirements and basic building parameters, and should be completed by the Project Manager or Project Architect.
- C. Divisions 02 through 50 are arranged according to the CSI/CSC MasterFormat. These items should be completed by designers or other technical personnel as appropriate. This should be done as early in the design stage as possible.
- D. During Schematic Design and early Design Development phases, when detailed information is not available, simply give information which is general in nature; this will serve to define the scope of the project and will give sufficient information to begin a preliminary specification.
- E. When an item or product is specifically selected or the Drawings are detailed around it, identify it by name, type, number, manufacturer, etc. Use additional sheets if required. Whenever possible, include a copy of the catalog page.
- F. Drawings are quantitative; they should show locations of materials, dimensions, and relationship to other components. Specifications are qualitative; they should set forth detailed requirements for physical qualities, standards of workmanship, and methods of installation.
- G. In general trade names and manufacturer's names should not appear on drawings; use generic designations only. An exception to this rule is in the case of material schedules where materials are called out by specific manufacturer, model, etc.
- H. Drawings should not define the scope of the various subcontractors. They may, however, need to include a statement of items to be furnished by the Owner or under a separate contract.

DIVISION 01 - GENERAL REQUIREMENTS

☐ WORK IN THIS CONTRACT

- ☐ Site ☐ General Construction ☐ Mechanical/Electrical ☐ Irrigation System
☐ Landscaping ☐ Interior Finish-Out ☐ Graphics ☐ Other

☐ SEPARATE CONTRACTS

Define coordination requirements of work to be included under separate contract

☐ SPECIAL SITE REQUIREMENTS

- ☐ Limited access ☐ Designated parking areas ☐ Controlled entry to existing buildings ☐ Noise control
☐ Dust control ☐ Working hours ☐ Debris removal ☐ Other

Will access routes, parking and staging areas be designated on Drawings? ☐ No ☐ Yes

☐ LEED Certification required.
